BioConnect

Our system takes a series of measurements and comes up with a unique identity for each student's finger. We do not store the fingerprint image and the process cannot be reversed to retrieve the finger measurements.

Enrollment

- Enrolls up to 10 fingers for one ID. We recommend enrolling both index fingers.
- Enrolls students during normal operation.
- Ability to enroll from all clients simultaneously.

Speed

- Speeds of access are extremely fast, even with very large databases. Initial database license are 5,000, but can be expanded up to 200,000 (additional license cost) for district level installation.
- Searches the entire database of IDs in less than 2 seconds.

Capacity

- Pre-load patron data, via comma, or tab delimited text file.
- Accepts up to 6 different ID numbers.
- Accepts up to 5 user-defined fields.
- Batch update database with new students via comma or tab delimited text file.
- Batch update database inserting new students and deleting graduated students via comma or tab delimited text file.

BioConnect: System Requirements

Server Requirements

- 2GB of hard drive space will be more than adequate for even very large schools
- RAM should follow the minimum specifications for the operating system selected
- Operating system can be any currently supported Microsoft windows operating system, either server or non-server operating system
- Must support TCP-IP

Client Requirements

- 1MB hard drive space will be more than adequate
- RAM should follow the minimum specifications for the operating system selected
- Operating system can be any currently supported Microsoft windows operating system, either server or non-server operating system
- Must support TCP-IP
- 1 USB 2.0 or higher port for finger reader
- 1 USB 2.0 or higher port for feedback light

Freight	Estimated Shipping, Handling, Insurance	1.00	\$15.00	\$15.00

Subtotal \$1,635.00
 Total Price \$1,635.00
 Grand Total \$1,635.00

Support Information

- One year support included: Unlimited 800 support calls, direct connect support, updates to current version, discounts on replacement readers and discounts on re-licensing for server replacement.
- Additional year(s) of extended support available.

We DO NOT store the fingerprint image once the system is implemented and the student is enrolled. Through our wedge software, BioConnect will direct the ID number into Skyward when the student places their finger on the device.

Return Policy

- School Technology Associates must be notified of return within 30 days of purchase. A restocking fee of 15% may apply, as well as forfeiture of the install, training, and shipping fees.
- Items must be returned in the original packaging and unused. Consumables must be unopened.
- The customer is responsible for return shipping costs.
- An RMA must be issued by a School Technology Associates employee. The RMA number must be clearly marked on the outside of the package. Contact support@k12sta.com to request an RMA number.
- Please speak to your sales representative if you have questions regarding the product you're ordering.

This quote and any purchase order issued by Customer in connection with this quote shall be subject to the Standard Terms and Conditions located at k12sta.com/standard-terms-and-conditions/

School Technology Associates is committed to offering our Skyward customers innovative, quality products, designed by you - the user, Skyward and School Technology Associates.
